

Powering the Cancer Network of the Future

## Why Via Pathways?

**Prove** your value to key stakeholders including patients and referring physicians.

**Ensure** consistency of evidence-based care among your physicians in an increasingly complex field.

**Engage** in new reimbursement models with insurers and employers.

**Provide** your insurers with a better alternative to prior authorization.

**Better** engage patients through education and nurse triage.

**Increase** the success of your Clinical Trials Program through point of care awareness of available trials and better insight into program performance.

### Via Pathways CONTENT

Clinical algorithms for all significant aspects of cancer care

### Via Portal SOFTWARE

Decision support delivery tool

### Via Insight ANALYTICS

Reporting and analytics framework

### Via Triage SYMPTOMS

Patient symptom triage and tracking

### Via Cost Analyzer COSTING

Highly precise regimen cost information

Evidence-based care maps for the continuum of cancer care, developed by oncologists for oncologists and their team

Work-up

Treatment & Symptom Management

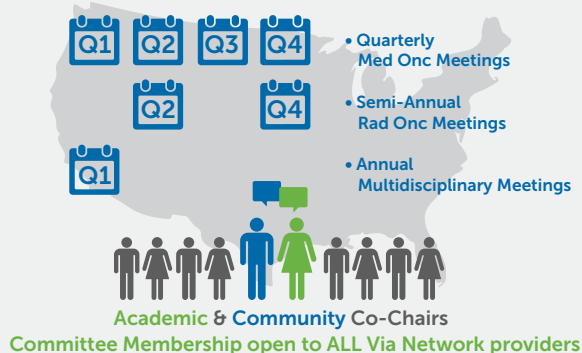

Survivorship

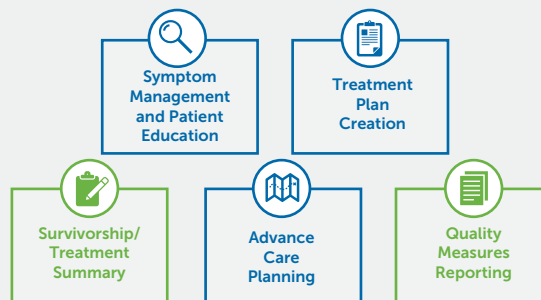

Advance Care Planning

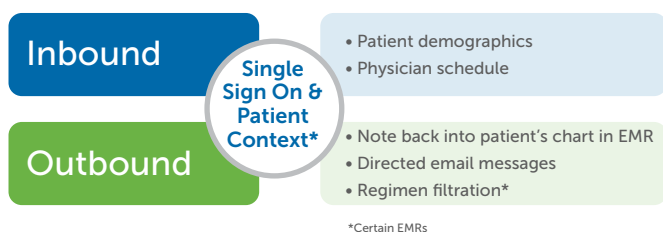

## Who develops the Via Pathways?

## Medical Home Support

## Integration with EMRs

## Our Network

1,000+ cancer physicians across academic centers, hospital- and community-based programs

## What do the Via Pathways cover?

>95% coverage of cancers

	Medical Oncology		Radiation Oncology			Surgical Oncology
